

i Civils Limited Environmental Policy

I Civils is a civil engineering and surfacing company that operates on sites throughout the UK. We recognise that our activities have an impact on the environment and that we have a responsibility to consider and minimise these impacts where possible.

We actively comply with relevant environmental legislation and throughout the planning, building and installation of our product we will adhere to local planning guidance and building regulations.

We have reviewed our environmental impacts and identified those which are the most significant to us. These impacts relate to:

- Minimising the amount of waste we produce through effective design and on-site management.
- Making efficient use of materials during the construction and installation process, including the use of recycled and existing materials when appropriate.
- Designing our product to incorporate features, when practicable and cost effective that minimise the impact on the environment during their habitation.
- Preventing pollution occurring.

We will provide training appropriate to our employees' particular environmental responsibilities to ensure that they are aware of our environmental impacts and their role in managing them.

Our Environmental Policy is reviewed at least annually to ensure its relevance to our business operations and that it is consistent with other policies.

For and on behalf of I Civils Limited

A handwritten signature in black ink, appearing to read 'H Johnson', with a stylized flourish at the end.

Howard Johnson
